

 **SKYTEC™**

Made To Perform.

3 Panel Mask
4500 Series

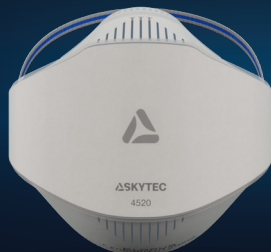

Ergonomically designed for

Comfort & Protection

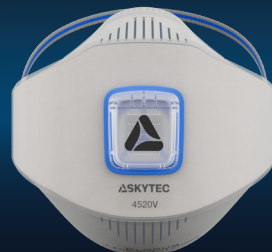

The Skytec 4500 3-panel fold-flat respirator Series is manufactured with premium UK-made filter media. Both valved and unvalved variants feature a high-quality finish to enhance user

acceptance. Individually packed for hygiene and convenience, compact for easy storage. The 4500 Series has been designed, developed and manufactured in the UK by the in-house Globus team.

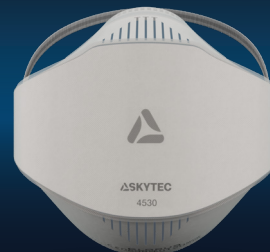

Choosing the **correct mask** for the application and wearer is crucial for optimal protection.

ensures high compatibility
with other PPE

**Full-width
internal face seal**
provides continuous
comfortable protection

Woven harness for
greater comfort and
preventing hair snagging

**Optimised
head hardness**
provides high face
fit pass rates across
various face shapes

Structured panels
provide additional strength
in maintaining the mask
shape structure

**High-performing
filtration system**
enables low breathing
resistance

**Non-ferrous
harness connection**
ensures use across all
industries and environments

High-quality Filter Media

The premium multi-layered electrostatic filter media ensures high-performing filtration with low breathing resistance.

High-performance Exhalation Valve

The high-flow exhalation valve is optimised for superior performance and low breathing resistance.

Structured Panels

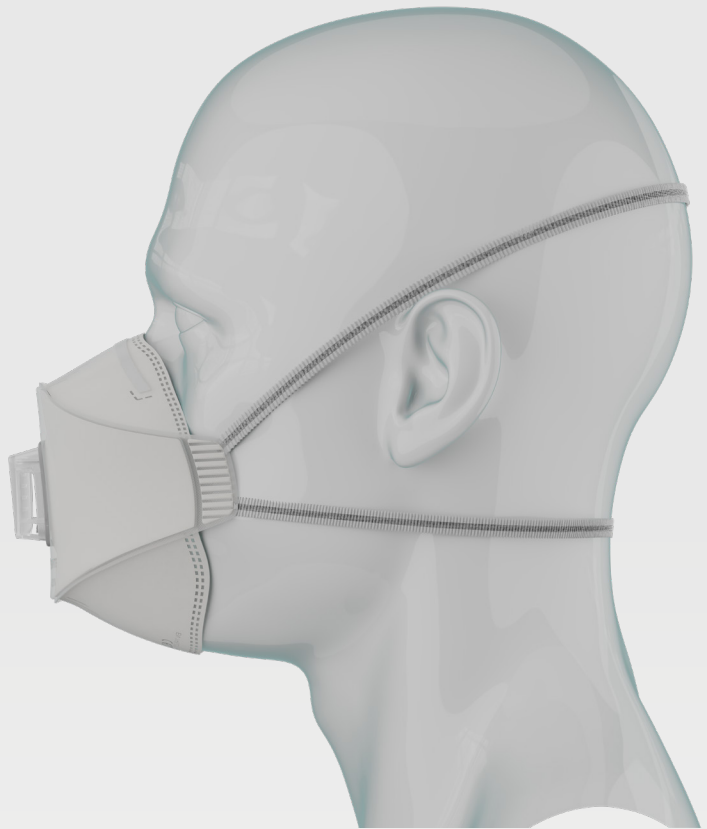

Structured panel system for comfort and prolonged use, maintaining mask shape integrity.

Made to fit a variety of face shapes

The 4500 Series is an inclusive solution for all workers. Latex-free and low linting, the 4500 Series is suitable for various applications across multiple industries.

The contoured ergonomic design allows greater facial movement, delivers exceptional fit test results, and ensures an excellent fit across a wide range of face shapes. With easy integration with other PPE, the user is provided with an excellent field of vision.

Full-width
internal face seal.

Adjustable nose bridge
provides a secure fit and
excellent comfort.

A solution based approach

The Globus 360 Safety Programme is a non-obligatory, tailor-made assessment that can be adjusted to align with your specific business requirements.

The Globus RPE safety programme

The Respiratory Protective Equipment (RPE) Programme is designed to help companies that seek the assurance that their workforce has adequate and suitable respiratory protection for their environment.

Working alongside Health and Safety

professionals, we will ensure that a compliant solution is specified, one that includes protective masks correct for the individual, task, and environment. The resulting solution will be tailored precisely for your organisation and includes the following 5 steps:

Unparalleled respiratory support service

At Globus, we have a dedicated team of Fit2Fit Accredited RPE Technical Specialists who provide comprehensive training and support to companies. This service is included as part of our extended after-sales support. Our specialists are proficient in both Qualitative and Quantitative Methods, ensuring that wearers receive the highest level of expertise.

Face fit testing

Compulsory training

Training in the correct use and care of respirators has been mandatory in the COSHH (Control of Substances Hazardous to Health) regulations since 1989. The 2002 revision of the COSHH regulations and the Approved Code of Practice (ACoP) now require that fit testing of Respiratory Protective Equipment (RPE) be carried out.

QLTK1P

Face fit testing kit

Our Qualitative Face Fit Testing Kits enable wearers of negative pressure half masks and disposable respirators to be Fit Tested correctly and economically. Four variations of the Kit are available depending on whether bitter or sweet sensitivity solutions are required and with a choice of cases. All are easy to use and supplied with full instructions.

Train the tester

Alpha Solway (Globus) Fit2Fit Accredited experts can also conduct 'Train the Tester' courses. These are designed to enable companies to carry out the Fit Testing of wearers with complete confidence. Contact us for more details.
