

GLOVEZON

Glovezon - Preventing chemical ingress at the wrist.

Chemical burns at the wrists are a common problem when there is no effective seal between gloves and chemical clothing sleeves. Glovezon provides a simple sealing solution by providing a splash proof seal to prevent injury.

- ▲ Suitable for many glove styles 30 – 35cm in length.
- ▲ Glovezon O ring cuff available on all Alpha Solway sleeved garments.
- ▲ Re-usable.
- ▲ Prevents ingress of chemicals and suitable for overhead work.
- ▲ Easy to fit.
- ▲ Tested to Type 3/4 dependent on garment type selected.
- ▲ Strong secure fit between gloves and chemical suit.
- ▲ Low cost, high value.

Easy to Fit

1. Prepare components

2. Push Cone into Glove

3. Position O ring in top rung of cone.

4. Push glove through Glovezon chemical clothing sleeve

5. Position Sleeve O ring over Glovezon cone and pull tight.
